

# UMANG UNAGAR

Laravel & PHP Backend Developer

Surat, Gujarat, India | unagarumang2003@gmail.com | +91 70692 92342 | [linkedin.com/in/umang-unagar](https://www.linkedin.com/in/umang-unagar)

## PROFESSIONAL SUMMARY

Backend-focused Laravel developer with 4 years of experience designing RESTful APIs, relational database schemas, and authentication/authorization systems for e-commerce and SaaS products. Proven track record integrating payment gateways (Stripe, Bambora, Paysafe, Authorize.Net), shipping/carrier services (ShipStation), and webhook-driven data pipelines between WordPress/WooCommerce and custom Laravel applications. Comfortable across the stack with Vue.js for front-end integration, and committed to clean, maintainable, well-tested code across the full SDLC.

## CORE SKILLS

**Languages:** PHP, JavaScript, SQL

**Backend:** Laravel, Microservices, MVC Architecture, Eloquent ORM, Laravel Sanctum, RESTful API Design, Webhooks, jQuery

**Frontend:** Vue.js, Blade Templating, Bootstrap, Tailwind CSS, CSS3

**Databases:** MySQL, PostgreSQL, Database Schema Design

**Payment Gateways:** Stripe, Bambora, Paysafe, Authorize.Net | **Shipping/Carrier Service:** ShipStation

**Integrations:** WooCommerce/WordPress Sync, Trustpilot API

**Tools & Practices:** Git, GitHub, GitLab, Postman, API Debugging, Agile Collaboration

## PROFESSIONAL EXPERIENCE

### Laravel Developer — Sourrcecube Technologies Pvt. Ltd.

Jun 2024 – Present

- Build and maintain a Laravel-based e-commerce platform with a Vue.js front end, designing RESTful APIs that power both customer-facing and admin workflows, and contributing hands-on to frontend UI components.
- Design and maintain microservices-based backend components, decoupling core e-commerce functions (orders, sync, payments) into independently deployable services for better scalability and fault isolation.
- Engineer real-time, webhook-driven synchronization of users, orders, and products between a WordPress/WooCommerce storefront and a custom Laravel CRM, eliminating manual data reconciliation.
- Integrate and maintain multiple secure payment gateways (Bambora, Paysafe, Authorize.Net) alongside automated Trustpilot review-request emails, directly supporting checkout reliability and post-purchase engagement.
- Partner cross-functionally with front-end and product stakeholders to translate business requirements into scalable backend architecture.

### Laravel Developer — InfyOm Technologies

Jun 2023 – May 2024

- Delivered backend services for two SaaS products — a multi-tenant Hospital Management System (HMS/HMS-SaaS) and a real-time news platform — using modular, maintainable Laravel architecture.
- Designed relational database schemas and RESTful APIs to support secure multi-hospital tenancy within the HMS-SaaS platform.
- Built content-personalization logic for the real-time news application, tailoring article delivery to individual user preferences.
- Collaborated with product and QA teams from concept through deployment, prioritizing reliability and usability across concurrent SaaS releases.

### PHP Developer Intern — Loopcode Technology

Apr 2022 – May 2023

- Trained in full-stack fundamentals — HTML, CSS, JavaScript, jQuery, PHP, Laravel, Bootstrap, and Tailwind CSS — under senior developer mentorship.
- Shipped four independent practice applications (e-commerce storefront, Tic-Tac-Toe game, calculator, to-do list) plus a Laravel demo to build production-ready habits early.

## SELECTED PROJECTS

### Laravel CRM for WooCommerce E-Commerce Platform — Sourrcecube Technologies

- Problem:** A WordPress/WooCommerce storefront lacked a centralized admin and CRM layer, causing fragmented order, user, and product data.
- Solution:** Built a custom Laravel CRM with a Blade admin panel and Vue.js customer interface, syncing bidirectionally with WooCommerce via REST APIs and webhooks; refactored key backend functions into microservices for independent scaling, and contributed directly to Vue.js frontend components.
- Tech:** Laravel, Microservices, RESTful APIs, Vue.js, Blade, MySQL, WordPress/WooCommerce, Webhooks, Bambora, Paysafe, Authorize.Net, Trustpilot API.
- Impact:** Centralized data handling across two platforms, improved scalability through service decoupling, reduced manual order/product reconciliation, and automated post-purchase review requests.

### Hospital Management System (HMS & HMS-SaaS) — InfyOm Technologies

- Problem:** Hospitals needed configurable management software for both single-site and multi-tenant SaaS deployment.
- Solution:** Built scalable Laravel backends (Eloquent ORM, RESTful APIs, MySQL) supporting both a standalone HMS and a multi-hospital HMS-SaaS variant from a shared modular codebase.

## EDUCATION

### Master of Computer Applications (MCA) — Computer Programming, Specific Applications

Lovely Professional University | Jul 2025 – Present

### Bachelor of Computer Application (BCA)

Sutex Bank College of Computer Application and Science | Oct 2020 – Apr 2023
